#1 / BRAND STRATEGY

MOST AGENCIES
RUN CAMPAIGNS.
WE BUILD
SYSTEMS.

is the exact instant a customer decides. Most agencies miss it. ZDM captures it.

"WE ENGINEER THE MOMENT YOUR CUSTOMER DECIDES. THEN WE CAPTURE IT WITH SPEED NO COMPETITOR CAN MATCH."

Full-stack means no silos. Social spend informs SEO strategy. SEO informs CRM segmentation. CRM informs email automation. Every channel compounds every other. That's not marketing. **That's an engine.**

INTEGRATION
Social • Search • CRM • Automation as one unified growth system.

IMPACT
Revenue reported, not reach. Every engagement tied to a CFO-approved outcome.

INGENUITY
Human creative intelligence that algorithms can't replicate — ideas that earn attention.

THE Z
IS INEVITABLE.

DO

- ✓ Use the lime accent as the primary attention signal
- ✓ Apply wordmark in white on all dark backgrounds
- ✓ Use solid-color Z mark on photographic backgrounds
- ✓ Maintain minimum clear space of one Z-height on all sides
- ✓ Scale proportionally — never stretch or skew the wordmark

DON'T

- ✗ Apply gradients to the logo mark itself
- ✗ Use the lime wordmark on lime backgrounds
- ✗ Add drop shadows, effects, or decorative elements
- ✗ Place on busy photographic backgrounds without a solid backing
- ✗ Change the font, weight, or letter-spacing of the wordmark

THREE COLORS. ONE IDENTITY.

The ZDM Challenger palette is built on radical restraint. **Black. White. One electric accent.** Ninety-five percent of the world uses gradients and blends. ZDM Concept 2 doesn't. That restraint is the statement.

Electric Lime (#C8FF00) is the brand's visual fist — it appears sparingly, which is why it lands every single time. Reserve it for the most important moments: calls to action, active states, and the Z mark.

ELECTRIC LIME IS THE BRAND.

When 95% of agency brands use similar cool palettes — dark navy, electric blue, gradient overlays — one color system breaks through by refusal. Electric Lime (#C8FF00) reads as the least expected, most disruptive choice in the digital marketing space. It signals confidence, originality, and zero interest in blending in.

- Primary call-to-action buttons — always lime on black
- Z mark primary version — lime on black square
- Nav border (3px) and scroll progress bar
- Active states, hover underlines, focus indicators
- Statistics and data callout numbers
- Phase headers in roadmaps and timelines

Most agencies run campaigns. ZDM INC builds intelligence systems — AI-powered, full-stack growth ecosystems engineered to find your ideal customer at the precise zero moment they're ready to act.

Full-stack digital intelligence means social, search, automation, CRM, and AI analytics compound on each other in real time. Every dollar in paid social informs SEO strategy, which informs CRM segmentation, which informs email automation. This is the ZDM growth engine. Built once. Compounding forever.

05 / VOICE & TONE

SAY WHAT YOU MEAN. MEAN EVERY WORD.

✓ PRIMARY TAGLINE - RECOMMENDED

ZERO DISTANCE TO MARKET.

Directly uses the ZDM abbreviation. "Zero distance" implies speed, precision, elimination of friction, and proximity to the customer. It works everywhere — hero, business card, email signature, billboard. Short. Confident. Unforgettable.

ALTERNATIVE

BUILT FOR BRANDS THAT REFUSE AVERAGE.

Challenger energy. Confrontational in the best way. Filters clients who aren't ready for real growth.

ALTERNATIVE

ALGORITHMS NEED AMBITION.

Contrarian insight — AI without creative direction is just noise. ZDM provides both.

ALTERNATIVE

FROM SIGNAL TO SALE.

Full-funnel in four words. Signal = data. Sale = outcome. The entire ZDM promise compressed.

ALTERNATIVE

THE GROWTH SYSTEM. NOT THE AGENCY.

Direct differentiation. Positions ZDM as infrastructure, not vendor. Technical CMOs love this framing.

CAMPAIGN USE

WIN OR GO HOME.

Maximum challenger energy for campaign contexts — events, merch, social ads, billboard executions.

01

CONFIDENTLY INTELLIGENT

We know what we're talking about, and results prove it. No buzzwords — specific numbers and named mechanisms only.

02

CREATIVELY RIGOROUS

Artists who love spreadsheets. Engineers who understand culture. Every creative decision has a strategic foundation.

03

ENERGETICALLY PRECISE

Fast AND clear. Urgency doesn't mean sloppiness. Short sentences. Tight copy. Every word earns its place.

04

HONESTLY BOLD

We say the uncomfortable truths: most agencies waste budget; most campaigns underperform. We back it up.

06 / WEBSITE DIRECTION

THE GATE

THE SITE
IS THE
PITCH.

#	SECTION	DESIGN DIRECTION	VISUAL STYLE
01	Hero	Full-viewport black. Giant Bebas Neue headline — black with one lime word. Bold lime horizontal rule. Tagline + 2 CTAs. Ghost "Z" as massive background element at 4% opacity.	
02	Positioning	White section. Two-column: left = big editorial statement with bold text + lime border-left quote. Right = ZMOT diagram in black line art on white.	
03	Services	Black section. 6 services in table format — each row has service name in Bebas large + description in DM Sans small. Lime border-bottom on hover. No cards, no icons — type only.	
04	Proof Metrics	White background. 4 massive Bebas starts in lime — "3.2B" style. Fills half the viewport height per stat. Minimal labels in DM Mono. Counter animation on scroll.	
05	Case Studies	Full-bleed black-and-white client images. Over each: Bebas headline in white. Bottom strip: lime background with results in black type. Horizontal scroll on desktop.	
06-08	Process - AI - Testimonials	Process: numbered Bebas steps with connecting lime vertical line. AI: specification list in DM Mono format. Testimonials: large italic DM Sans quote on white, no images.	
09	CTA Close	Full-viewport lime. Giant black Bebas headline. One black CTA button. No distractions. The lime section IS the urgency — no gradient needed. The most disruptive section of any agency site in the space.	

KEY CREATIVE DIFFERENTIATORS

THE FINAL
SECTION IS
ALL LIME.

→ Lime scroll progress bar — 4px, full width, top of viewport

→ No gradients anywhere on the site — restraint is the differentiator

→ Full lime CTA section — no competitor does this, it's impossible to ignore
